## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,10,11, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,266,486 (Fraatz et al.).

Figures 1, 2c and 5 show the embodiments which read on the claimed invention. The patent discloses a bioreactor (1) which includes three optodes (3a,3b,3c) which are optical chemical sensors used for the simultaneous detection of the changes in oxygen, carbon dioxide, and pH. The device further comprises a light source (9), a detector (11) and a two-armed light waveguide (10). The light source (9) is capable of providing a variety of excitation energies corresponding to the sensors (3a,3b,3c). Detector signals are transmitted to an evaluation unit (15) in which the chemical content is determined (col.2, lines 1-47). Figure 5 shows the embodiments which reads on claims 10 and 11.

### ***Allowable Subject Matter***

Claims 2-9,12,13, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The remaining US patents cited are considered to be generally related to the claimed invention.
